

Choice of USI-TECH turning grades

USI-TECH Grades	ISO	Applications
U-908	P15-P30	PVD-coated tungsten carbide for a wide range of steel turning applications
U-35	P30-P45	PVD-coated tungsten carbide for a wide range of threading, cutting, grooving and drilling applications.
U25TIN	P25-P30	PVD/TIN-coated tungsten carbide for general applications
U-C	P10-P20	Uncoated titanium carbide (cermet) for large turning applications with good surface finish and low coefficient of friction
U-CTIN	P10-P20	PVD/TIN-coated titanium carbide (cermet) for large turning applications with good surface finish and low coefficient of friction
U-AL	K05-K15	Uncoated tungsten carbide for wide-ranging turning applications in aluminum, cast iron and non-ferrous materials
